K-JC 503

JAW CRUSHER

K-JC 503

19 x 12 inch

Tier 4F 24.7 Hp Diesel
Kohler KSD 1403

Up to 34 tph

3/4 to 3-1/4 inch

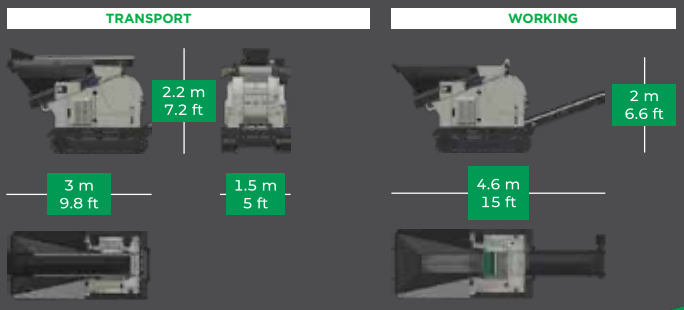

7,496 lb

Limited access job sites are no obstacle for the K-JC 503. Designed for contractors who want to recycle demolition, paving, construction, or landscaping material directly on-site, this compact mobile jaw crusher delivers serious performance in a small footprint. Equipped with rubber tracks and a wireless remote control, the K-JC 503 is Komplet America's most compact jaw crusher, featuring a hydraulically adjustable 19" x 12" single-toggle jaw.

An integrated ultrasonic sensor above the crusher inlet automatically controls the feed belt, preventing material buildup and reducing the risk of jamming. With an adjustable output range from ¾" to 3¼" and production rates up to 34 tons per hour, the K-JC 503 allows operators to create reusable material on demand. Lightweight, maneuverable, and easy to transport, it helps contractors cut hauling costs, reduce landfill fees, and repurpose material directly on the jobsite. The K-JC 503 is a smart, cost-saving solution for on-site crushing where space, access, and efficiency matter most.

FEATURES AND BENEFITS

- Compact size for versatility, maneuverability and ease of transport
- Hydraulically adjustable jaw setting
- Jaw chamber level sensor
- Jaw plates are reversible meaning they have two lives
- Loading belt with feeding speed adjustment knob
- Dust suppression water spray nozzles
- Wireless remote controller
- Easy & intuitive button operations
- Quick set-up time typically under 15 minutes

K-JC 604

JAW CRUSHER

K-JC 604

(23" x 16")

Tier 4F **74** Hp Diesel
Deutz TCD 2.2

55 tph

3/4" to 3-1/4"

19.400 lb

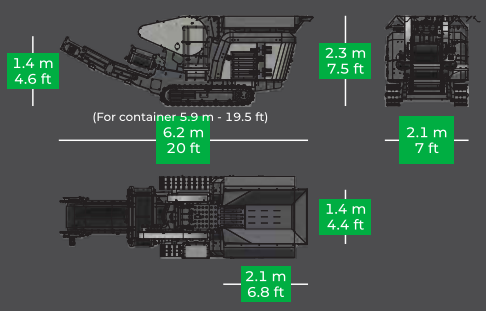

The K-JC 604 is built for contractors looking to efficiently recycle construction and demolition waste while avoiding rising disposal and hauling costs. Featuring a 23" x 16" jaw crusher paired with an integrated vibrating feeder, the K-JC 604 delivers a smooth, consistent material flow into the crushing chamber for reliable performance.

Material is processed through a fast, linear feed motion, improving throughput and reducing blockages. The closed-side setting (CSS) is hydraulically adjustable via remote control, allowing operators to quickly fine-tune output size without stopping production. Compact, mobile, and easy to operate, the K-JC 604 is ideal for on-site recycling applications where productivity, simplicity, and material control are essential.

FEATURES AND BENEFITS

- Compact size for versatility, maneuverability and ease of transport
- Hydraulically adjustable jaw setting
- Reverse jaw function for sticky applications / clearing blockage
- Jaw plates are reversible meaning they have two lives
- Vibrating grizzly feeder with variable speed & integrated hopper
- Chamber level sensor
- Direct drive crusher
- Access platform

WORKING AND TRANSPORT

- Wireless remote controller
- Easy & intuitive button operations
- Quick set-up time typically under 15 minutes

K-JC 704 *PLUS*

JAW CRUSHER

K-JC 704 *PLUS*

(27" x 16")

Tier 4F 74 Hp Diesel
Deutz TCD 2.2

90 tph

3/4" to 3-1/4"

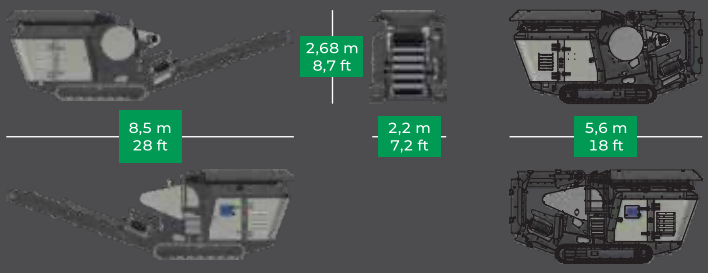

26.455 lb

The Komplet K-JC 704 PLUS is a compact, mobile jaw crusher engineered for contractors, recyclers, and rental fleets who need strong crushing power without sacrificing mobility. With a larger jaw design and robust construction, it efficiently processes concrete, asphalt, demolition debris, and natural stone into reusable material.

Tracked mobility allows for easy transport and fast setup, while user-friendly controls and adjustable output sizing help operators dial in the exact end product required for each application. A reinforced frame, simplified maintenance access, and noise- and dust-reducing design make the K-JC 704 PLUS a dependable, jobsite-ready solution that balances durability, flexibility, and efficiency for demanding crushing operations.

FEATURES AND BENEFITS

- Compact size for versatility, maneuverability and ease of transport
- Hydraulically adjustable jaw setting
- Reverse jaw function for sticky applications / clearing blockage
- Chamber level sensor
- Direct drive crusher
- Jaw plates are reversible meaning they have two lives
- Rubber pads bolted on metal track chains for transportation

- Access platform
- Wireless remote controller
- Easy & intuitive button operations
- Quick set-up time typically under 15 minutes

K-JC 805

JAW CRUSHER

K-JC 805

(31" x 21")

Tier 4F **174** Hp Diesel
Deutz 4.0 or 134 Hp with the Hyundai DM03 (Doosan D34)

160 tph

1-3/8" to 4-3/4"

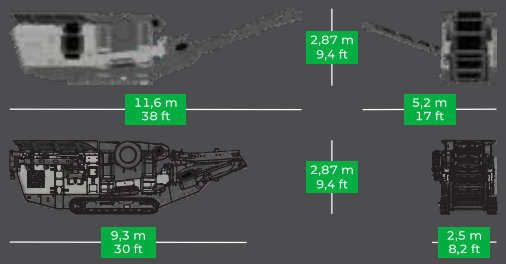

51,808 lb

The K-JC 805 is Komplet America's largest compact mobile jaw crusher, delivering high output while maintaining the maneuverability contractors expect from a compact machine. Designed to handle medium to hard rock, reinforced concrete, asphalt, and demolition material, the K-JC 805 is well suited for contractors, quarry operators, and recycling applications that demand consistent performance.

Despite its powerful crushing capability, the K-JC 805 remains easy to transport and capable of accessing tight jobsite conditions. The machine is engineered with excellent access to the engine and crushing chamber, simplifying maintenance and reducing downtime. For operators looking to increase production while cutting waste removal costs, the K-JC 805 offers an ideal balance of power, accessibility, and compact efficiency.

FEATURES AND BENEFITS

- Compact size for versatility, maneuverability and ease of transport
- Hydraulically adjustable jaw setting
- Reverse jaw function for sticky applications / clearing blockage
- Direct drive crusher with excellent access to drive belts and hydraulics
- Pan feeder with load sensing
- Magnetic belt raises hydraulically for clearance
- Integrated hydraulic folding stockpiling conveyors
- Access Platform + Open chassis design for ease of maintenance
- Wireless remote controller
- Easy & intuitive button operations

K-IC 70

IMPACT CRUSHER

K-IC 70

(25" x 20")

Tier 4F 134 Hp Diesel
Hyundai DM03 (Doosan D34)
or 100 Hp with the Deutz TCD 2.9

90 tph

3/4" to 3-1/4"

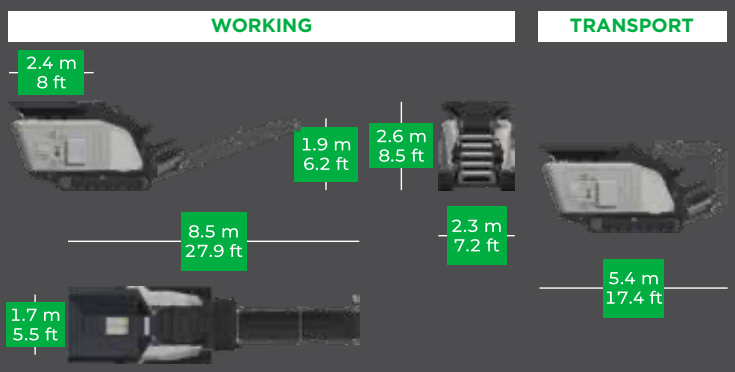

28.600 lb

The K-IC 70 impact crusher provides an economical solution for contractors looking to recycle material on-site with low capital and operating costs. Designed for crushing and stockpiling across a wide range of recycling applications, it efficiently processes construction and demolition waste, asphalt, concrete, clay bricks, blocks, ceramics, glass, and other solid materials.

Its compact size, easy transport, quick setup, and intuitive operation make the K-IC 70 an excellent choice for contract crushers, rental houses, and small-scale operators. By producing consistent, high-quality material directly on-site, the K-IC 70 helps reduce hauling expenses, improve jobsite efficiency, and maximize return on investment.

FEATURES AND BENEFITS

- Compact size for versatility, maneuverability and ease of transport
- Hydraulically adjustable apron setting
- Blockage release hydraulic mechanism on crusher
- Vibrating feeder with chamber level sensor
- Hydraulic magnetic belt to help remove metal
- Rubber pads bolted on metal track chains for transportation
- Dust suppression system
- Wireless remote controller

- Easy & intuitive button operations
- Quick set-up time typically under 15 minutes

KOMPATTO
221

VIBRATING SCREENER

KOMPATTO 221

1. **7x3.5** feet
2. **7x3.5** feet

Tier 4F **24.7** Hp Diesel
Kohler KSD 1403

90 tph

7,275 lb

The Komplet Kompatto 221 is one of the smallest self-propelled mobile screening plants on the market, designed specifically for limited-access job sites. This compact vibrating screener can be fed directly by an excavator, backhoe, processed material pile, or even the discharge belt of a Komplet crusher—eliminating the need for additional handling equipment.

Powered by a 24.7 HP diesel engine and equipped with two 7′ x 3.5′ screens, the Kompatto 221 delivers production rates up to 90 tons per hour. Despite its small size, it provides efficient screening for construction and demolition debris, excavation material, and rubble. Highly maneuverable and easy to transport, the Kompatto 221 is the ideal screening solution for contractors working in confined spaces who still need dependable performance.

FEATURES AND BENEFITS

- Compact size for versatility, maneuverability and ease of transport
- Interchangeable screen decks
- Direct feed onto pan area
- Hydraulically folding conveyors
- Wireless remote controller
- Easy & intuitive button operations
- Quick set-up time typically under 15 minutes

WORKING

KOMPATTO
5030

VIBRATING SCREENER

KOMPATTO 5030

1. 8x3 feet
2. 7x3 feet

Tier 4F 60 Hp Diesel
Hyundai DM01

280 tph

26,455 lb

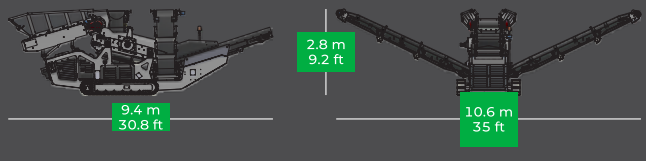

The Komplet Kompatto 5030 is a compact, self-propelled mobile screener designed for high-volume screening with maximum versatility. Ideal for job sites, small quarries, demolition projects, and waste applications, the Kompatto 5030 combines optimal size and weight with powerful screening performance.

Its heavy-duty sloping double-deck screen box supports a wide range of screening media, including steel mesh, punch plates, and reinforced bars, allowing operators to screen sand, gravel, aggregates, C&D material, landfill waste, and topsoil. The 3-way split configuration delivers precise material separation, while its ability to function as a standalone screener or a pre-screen for crushing operations adds flexibility. Built for demanding daily workloads, the Kompatto 5030 offers excellent maneuverability, transportability, and consistent results—making it a reliable sorting solution for high-output screening applications.

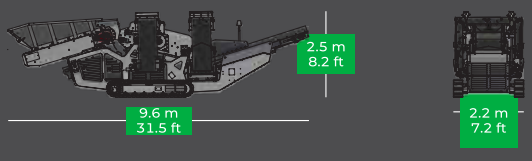

FEATURES AND BENEFITS

- Heavy duty single shaft incline screenbox with adjustable stroke & speed
- Fast conversion from 3-way split to 2-way split fully hydraulic for optionally mixing oversize and midsize product
- Hydraulically folding conveyors
- Variable feeder speed
- Versatile screenbox from the operation of scalping before and screening after the operation of crushing
- Wireless remote controller
- Easy & intuitive button operations

WORKING

TRANSPORT

- Quick set-up time typically under 15 minutes

KOMPATTO
124

MOBILE SCREENER

KOMPATTO 124

1. 11.8ft x 3.7ft
2. 10.8ft x 3.7ft

Tier 4F **74** Hp Diesel
Deutz TCD 2.2 or Perkins 904J-E28T

350 tph

37,038 lb

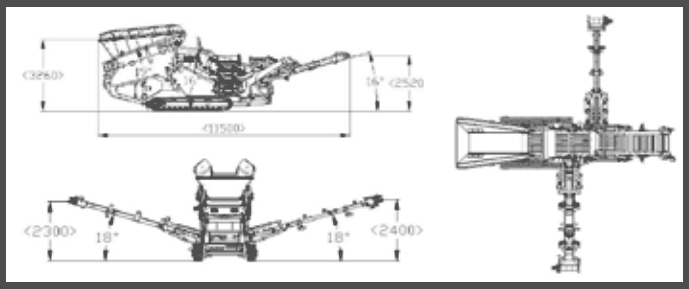

The Komplet Kompatto 124 is a compact, tracked screener built for contractors, landscapers, recyclers, and rental fleets that need high performance in a highly mobile package. With a small footprint and impressive capacity, it allows operators to screen material directly on-site, reducing hauling costs and improving overall efficiency.

Fast setup and user-friendly controls allow screening operations to begin within minutes. Designed for versatility, the Kompatto 124 processes topsoil, gravel, sand, mulch, compost, aggregates, and demolition waste with precision. Easy to transport using a standard trailer and capable of navigating tight spaces, it's an ideal solution for operators who need flexibility across multiple jobsites. The Kompatto 124 turns raw material into usable products on demand, helping maximize productivity while minimizing labor and transportation costs.

FEATURES AND BENEFITS

- Heavy duty single shaft incline screenbox with adjustable stroke & speed
- Fast conversion from 3-way split to 2-way split fully hydraulic for optionally mixing oversize and midsize product
- Hydraulically folding conveyors
- Variable feeder speed
- Versatile screenbox from the operation of scalping before and screening after the operation of crushing
- Easy & intuitive buttons operations

WORKING

- Wireless remote control
- Quick set-up time

K-TS 30

TROMMEL SCREENER

K-TS 30

1. 5.7ft x 4.3ft
2. 8.7ft x 4.3ft

0,1 to 2,3 inch

Genset 23 kW
50 Hz
380 V

Up to 80 tph

8,818 lb

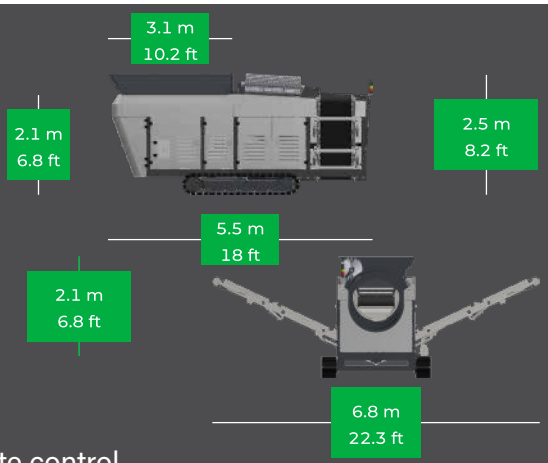

The K-TS 30 represents the next generation of Komplet mobile trommel screeners, delivering high throughput in a compact, efficient design. Capable of producing three material fractions—fines, mids, and overs—it is well suited for a wide range of screening applications.

Its fully electric drive system powers everything from the hopper to the discharge conveyors, significantly reducing energy consumption, wear, and maintenance requirements. Designed for cost-effectiveness and performance, the K-TS 30 sets a new standard for compact trommel screening, making it an excellent choice for operators seeking efficiency, reliability, and low operating costs.

FEATURES AND BENEFITS

- Heavy duty incline trommel screen with adjustable speed
- Power options: diesel-electric or all electric option
- Single or double trommel with same machine
- Quick change mesh
- Easy access to platform
- Hydraulically folding conveyors
- Variable feeder speed
- Cleaning brush
- Intuitive automation & control system
- Wireless remote control
- Quick set-up time typically under 15 minutes

WORKING

K-TS 40

TROMMEL SCREENER

K-TS 40

1. 10.5ft x 4.6ft
2. 14.3ft x 3.6ft

0.07 to 1.9 inch

Genset 40 kW
50 Hz
380 V

Up to 120 tph

25,353 lb

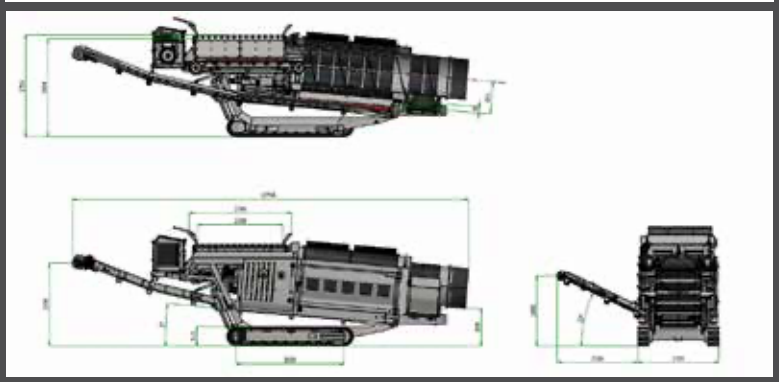

The K-TS 40 builds on the performance of the K-TS series, offering increased screening capacity while maintaining efficiency and mobility. Like the K-TS 30, it delivers three material fractions—fines, mids, and overs—making it ideal for high-volume screening applications.

A fully electric drive system minimizes energy usage and reduces wear on components, lowering service and operating costs over time. With advanced functionality and robust construction, the K-TS 40 is designed for operators who need higher throughput without compromising efficiency, reliability, or ease of operation.

FEATURES AND BENEFITS

- Heavy duty incline trommel screen with adjustable speed
- Power options: diesel-electric or all electric option
- Single or double trommel with same machine
- Quick change mesh
- Easy access to platform
- Hydraulically folding conveyors
- Variable feeder speed
- Cleaning brush
- Intuitive automation & control system

WORKING

- Wireless remote control
- Quick set-up time typically under 15 minutes

KROKODILE *PLUS*

SLOW-SPEED SHREDDER

KROKODILE *PLUS*

1,500 mm (60")
0-35 rpm - 160,000 Torque

Tier 4F 215 Hp Diesel
Volvo Penta TAD 582

C&D 175 tph
Waste/Wood 18 tph

34,000 lb

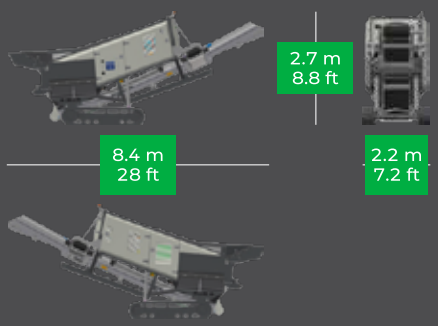

The Komplet Krokodile PLUS is a powerful, slow-speed mobile shredder engineered for demanding material processing applications. Designed to handle concrete, asphalt, wood, green waste, and bulky materials such as tree roots and white goods, it delivers reliable, controlled shredding performance.

Powered by a Volvo Penta 215 HP engine and equipped with dual-shaft shredding technology and Hardox wear components, the Krokodile PLUS offers durability and versatility in harsh environments. Hydraulic side grids, a tilting rear hopper, and quick-change shafts provide operational flexibility, while intuitive controls and remote monitoring simplify operation. Built on a rugged tracked chassis with reinforced protection and smart cooling, the Krokodile PLUS delivers efficient, economical shredding wherever the job demands it.

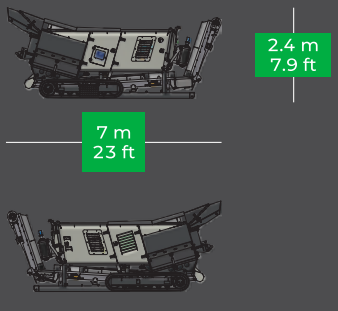

FEATURES AND BENEFITS

- Innovative control system with different shredding modes for different materials
- Rear tilt-hopper to help with feeding oblong materials
- Reverse dual shaft function for sticky applications / clearing blockage
- Hydraulically adjustable side walls
- Quick-change shaft system
- Wireless remote controller
- Easy & intuitive button operations

WORKING

- Quick set-up time typically under 15 minutes

SIMBA

SLOW-SPEED SHREDDER

SIMBA

2,000 mm (79")
0-35 rpm -240,000 Torque

Tier 4F 422 Hp Diesel
Volvo Penta TAD 1183

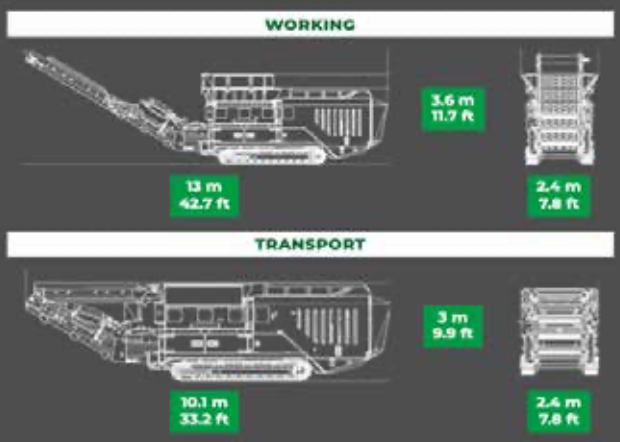

C&D 220 tph
Waste/Wood 27 tph

59,525 lb

The Komplet Simba is a high-production, slow-speed mobile shredder built for demanding material processing. It handles concrete, asphalt, wood, green waste, and bulky materials such as logs, stumps, tires, and mattresses with controlled, high-torque shredding.
Powered by a 422 hp Volvo Penta engine and equipped with dual-shaft shredding technology, the Simba delivers the torque and capacity that high-volume yards require. A hydraulic tipping hopper, quick-change shafts, and interchangeable screens and grids provide operational flexibility, while programmed shredding modes and a wireless remote simplify operation. Built on a rugged tracked chassis, the Simba shreds efficiently wherever the job demands it.

FEATURES AND BENEFITS

- Innovative control system with different shredding modes for different materials
- Hydraulic tipping hopper with extensions for a 9.8 cubic yard loading volume
- Anti-clogging sensor stops the shafts when the discharge belt is overloaded
- Quick-change shaft system
- Screens and grids for different output sizes
- Magnetic belt with hydraulic raise and lower
- Wireless remote controller

- Quick set-up time typically under 15 minutes

K-TC 460

CONVEYOR

K-TC 460

25" x 393"
Pile height
4600mm 181"
Belt type
Chevron 3ply

Tier 4F 24.7 Hp Diesel
Kohler KSD 1403

132 tph

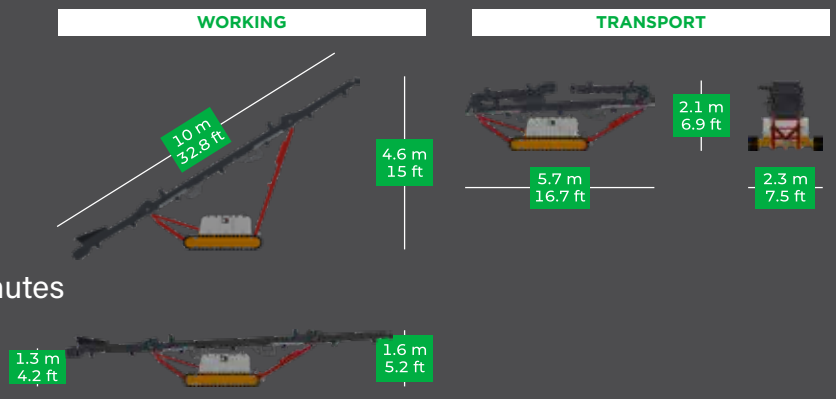

7.000 lb

The Komplet K-TC 460 is a high-performance tracked mobile conveyor designed to improve material handling efficiency while maintaining a compact footprint. Lightweight and easy to transport, it integrates seamlessly with Komplet crushers and screeners to move material quickly, safely, and efficiently on any jobsite.

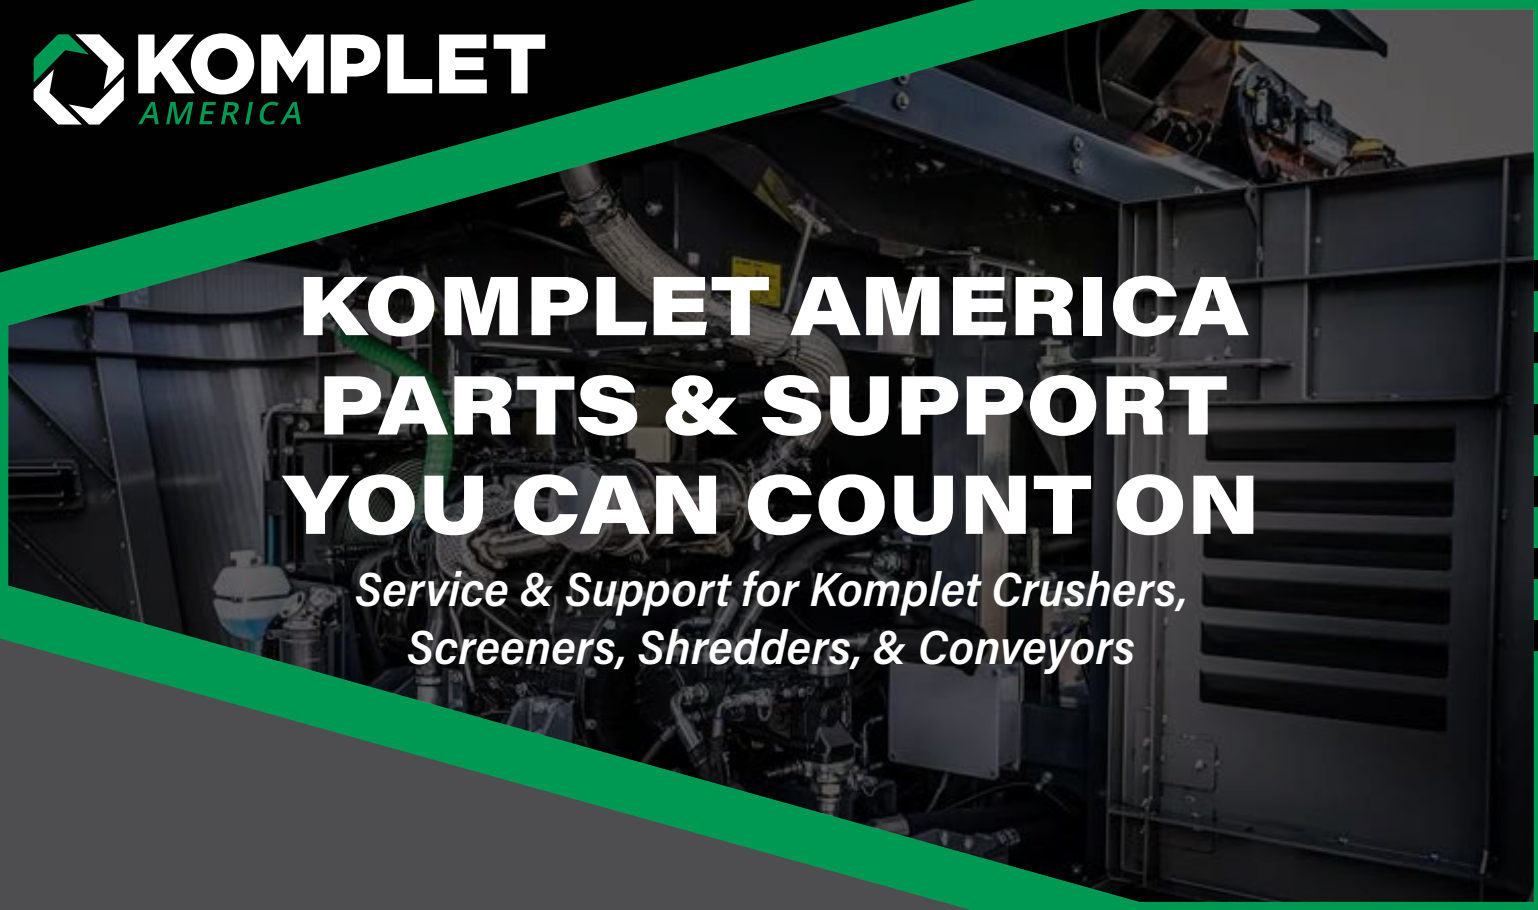

Its compact design allows for fast setup and easy repositioning, while increased stockpile capacity helps reduce loader dependency and improve workflow. The K-TC 460 is a cost-effective solution for operators looking to streamline material movement, improve site organization, and maximize productivity without adding complexity.

FEATURES AND BENEFITS

- High capacity up to 132 tph (depending on feed setup and material type)
- Hydraulically folding conveyor belts for easy transportation
- Wireless remote controller
- Easy & intuitive button operations
- Quick set-up time typically under 15 minutes
- Create better stockpiles
- Reduced loader dependency

KOMPLET AMERICA

KOMPLET AMERICA PARTS & SUPPORT YOU CAN COUNT ON

Service & Support for Komplet Crushers, Screeners, Shredders, & Conveyors

QUALITY SERVICE

Our expert service team is certified and ready to assist with all Komplet equipment. From installation and routine maintenance to troubleshooting and complex repairs, we've got you covered. Our U.S.-based service provider network ensures that your equipment stays running—365 days a year.

PARTS IN STOCK & READY TO SHIP

Komplet mobile equipment needs proper care—and we make it easy:

Critical Parts: Always available for fast dispatch
Wear Parts: Plates, belts, and other high-wear items in stock
Maintenance Parts: Filters and specialty components for all units
